Education

Bachelor of Engineering in Automation and Robotics Engineering

MES Wadia College of Engineering, Pune, MH, INDIA

2023 – 2027

CGPA: 7.5 /10

Arham School and Junior College, MH, INDIA

Class 12, HSC

2022 – 2023

Aggregate: 56%

St Francis De Sales School, MH, INDIA

Class 10, SSC

2020 – 2021

Aggregate: 74.40%

Technical Skills

Certifications: Johnson & Johnson- Robotics and Controls Job Simulation

CAD Softwares: Autodesk AutoCAD, Autodesk Fusion 360, Ansys Workbench, Ansys Mechanical APDL

Programming Skills: MATLAB, Python, C, C++, Arduino IDE

Robotics Framework: Ros2 jazzy, open cv, yolo

Experience

Automation & Manufacturing Intern - Kirloskar Pneumatic Company Limited, Pune

January 26 - February 26

- Studied reciprocating and screw compressor systems, including air, lubrication, and cooling circuits.
- Observed machining, fabrication, and compressor package assembly processes.
- Analyzed pipe preparation and ASME-based welding practices; conducted productivity comparison of manual vs robotic welding.
- Reviewed workflow efficiency, automation feasibility, safety systems, and quality practices on the shop floor.

Projects/Competition

CV-Based Gesture Control System for Mecanum Kinematics (Project)

May 26

- This project involves the design and implementation of a real-time, computer vision-based control interface for an omnidirectional Mecanum-wheeled robotic platform.
- It utilizes gesture-based vector decomposition to enable multi-directional navigation without the need for physical controllers.

Mindspark Robotica 2025 (competition)

October 25

- Competed in the national-level Robo Falconry event conducted by COEP, securing 6th place by implementing drone control strategies.

Engineering Today 2025 (competition)

September 25

- Designed and Fabricated a competitive Robo Soccer platform, gaining practical expertise in embedded systems hardware, including Cytron Motor Driver, Arduino, motors, and RF communication

SIH 2025 (competition)

September 25

- A Developed proof-of-concept for PathGene.ai, an AI-Powered Personalized Learning platform, utilizing Figma for comprehensive UI/UX prototyping; successfully cleared the Internal Hackathon round.

Multi-Layered Intelligent Security and

November 25

Access Control System for High-Value Assets (project)

- Built a four-level embedded security system featuring optical intrusion detection, IR motion sensing, keypad-based access control with servo actuation, DFPlayer-based audio alerts, and a MOSFET-driven tripwire alarm. Demonstrated real-time sensor integration, power distribution design, and microcontroller programming on Arduino.

Extracurricular

Roboclub

September 25 - present

- Documentation Head at the Roboclub, managing all technical and overall club records to ensure knowledge transfer and organizational efficiency. Cultivated skills in public speaking, technical writing.

Forengers Foundation

October 24- present

- Managed data handling operations for the Tech Team of a government-registered NGO, streamlining data access and improving the ownership and accessibility of organizational drives.

Arts & Cultural Competitions

February 25

- Firodiya Karandak 2025, Dajikaka Gadgil Karandak 2024
- Contributed to high-stakes cultural competitions through acting and critical backstage support
- Demonstrating teamwork, adaptability, and commitment to project goals.
