Education

Bachelor of Engineering in Automation and Robotics Engineering **2023 – 2027**
MES Wadia College of Engineering, Pune, MH, INDIA *SGPA: 8.09/10*

Arham School and Junior College, MH, INDIA **2022 – 2023**
Class 12, HSC *Aggregate: 56%*

St Francis De Sales School, MH, INDIA **2020 – 2021**
Class 10, SSC *Aggregate: 74.40%*

Technical Skills

Certifications: Johnson & Johnson- Robotics and Controls Job Simulation
CAD Softwares: Autodesk AutoCAD, Autodesk Fusion 360, Ansys Workbench, Ansys Mechanical APDL
Programming Skills: MATLAB, Python, C, C++, Arduino IDE

Experience

Automation & Manufacturing Intern - Kirloskar Pneumatic Company Limited, Pune **January 26 - February 26**

- Studied reciprocating and screw compressor systems, including air, lubrication, and cooling circuits.
- Observed machining, fabrication, and compressor package assembly processes.
- Analyzed pipe preparation and ASME-based welding practices; conducted productivity comparison of manual vs robotic welding.
- Reviewed workflow efficiency, automation feasibility, safety systems, and quality practices on the shop floor.

Projects/Competition

Mindspark Robotica 2025 (competition) **October 25**

- Competed in the national-level Robo Falconry event conducted by COEP, securing 6th place by implementing drone control strategies.

Engineering Today 2025 (competition) **September 25**

- Designed and Fabricated a competitive Robo Soccer platform, gaining practical expertise in embedded systems hardware, including Cytron Motor Driver, Arduino, motors, and RF communication

SIH 2025 (competition) **September 25**

- A Developed proof-of-concept for PathGene.ai, an AI-Powered Personalized Learning platform, utilizing Figma for comprehensive UI/UX prototyping; successfully cleared the Internal Hackathon round.

Multi-Layered Intelligent Security and Access Control System for High-Value Assets (project) **November 25**

- Built a four-level embedded security system featuring optical intrusion detection, IR motion sensing, keypad-based access control with servo actuation, DFPlayer-based audio alerts, and a MOSFET-driven tripwire alarm. Demonstrated real-time sensor integration, power distribution design, and microcontroller programming on Arduino.

Autonomous Robotic Arm for Production Line (Project) **May 25**

- Developed an autonomous robotic arm for production-line automation using modular mechanical design, high-torque servos, IR sensors, motor drivers, and Arduino-based control architecture. Implemented pick-and-place motion planning, force-based safety, and real-time sensing to improve throughput, consistency

Extracurricular

Roboclub **September 25 - present**

- Documentation Head at the Roboclub, managing all technical and overall club records to ensure knowledge transfer and organizational efficiency. Cultivated skills in public speaking, technical writing.

Forengers Foundation **October 24- present**

- Managed data handling operations for the Tech Team of a government-registered NGO, streamlining data access and improving the ownership and accessibility of organizational drives.

Arts & Cultural Competitions **February 25**

- Firodiya Karandak 2025, Dajikaka Gadgil Karandak 2024
- Contributed to high-stakes cultural competitions through acting and critical backstage support
- Demonstrating teamwork, adaptability, and commitment to project goals.
